### *Exclusive Service*

Since 2004 Algordanza offers you a genuine and conscientious service to recover and keep your love one's essence in the most beautiful way.

Call us and we will answer your questions, and once your decision is made we will set an appointment. You don't need to make any deliveries nor come to us- we will come to you personally.

In this first meeting we will pick up the necessary essence –ashes and/or hair.

You will receive personalized updates throughout the transformation process and your final Diamond or Jewell will be also delivered to you in person.

This individualized service –available in the Iberian Peninsula and islands- is already included in the fees.

### *Exclusive Scientific Process*

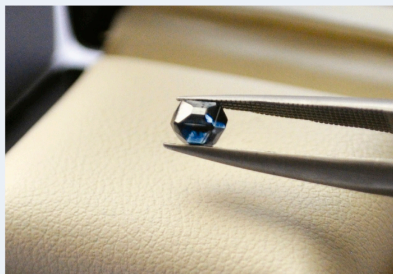

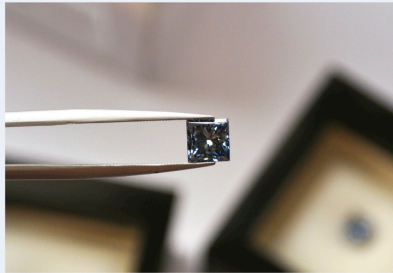

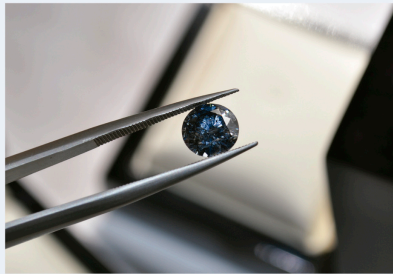

Our exclusive scientific process is possible with recent or ancient essences (hair and/or ashes) or essence resulting from an exhumation process. One or several Diamonds from the same person can be created, or from the mixed essences from different persons.

Each process is carried out individually and the successful result depends on the Carbon concentration present in the essence. This Carbon concentration is not determined by the weight, size nor the person's age; therefore a complex and strictly personalized process is needed even in the most technical steps. This is how each Diamond is 100% created according to its own natural composition, allowing it to express its own natural behavior and growth times.

Each Diamond has a natural bluish color thanks to the presence of Boron (B) in our bodies, and due to the effect of light according to its own physical structure.

The process consists of a series of steps that are repeated until 96% of the carbon in the ashes is isolated, along with other elements –present in the ashes and/or hair- such as  $\text{CO}_2$ ,  $\text{CaCO}_3$ ,  $\text{C}_2\text{H}_2$ , etc. This carbon is then transformed into Graphite, changing its molecular structure. At that point it is moved along a series of purification phases. After compression, it results in 99,99% carbon atoms. Then it passes to a stage of growth or crystallization, in an environment with HTHP technology (High Temperature High Pressure) in order to obtain the desired gems.

Our exclusive scientific process made in Switzerland and our personalized service are supported by international entities as our highest seal of differentiation and guarantee.

## *Characteristics of an Algordanza Diamond*

### **Carat**

We can create 1 or several Diamonds from the same person or from the mixture of the essences of more than one person. Ashes and/or hair can be used. The minimal quantity needed vary in every single case.

### **Cut**

We offer you the Heart, Round and Princess cuts or Uncut (Rough) option, so you can keep the totality of the essence untouched. Each Uncut Diamond has a unique, natural, unaltered shape.

### **Color**

The presence of Boron (B) in the body, in its different concentrations, is the major influence for your Diamond to have a bluish color. It can go from a white Diamond with blue sparks to a deep blue color. For strict ethical reasons and as part of our unique scientific process, the color is not altered nor changed.

### **Clarity**

Our mission is to offer you Diamonds of highest authenticity and quality.

### Jewelry

We offer you the possibility of creating a special jewel with the finest craftsmanship. In collaboration with prestigious ateliers, specialized in fine jewelry, with several decades of experience working for international brands such as Cartier, Tous or Vasari. You can choose from different materials such as platinum, gold or silver. This fees will be estimated according to the jewel and material selected.
